Dear Dr. Olivier

Thank you for the referral of the above patient for a pre-operative assessment.

Pre - operative Evaluation

Pre - operative Evaluation : TKR (R)
 Referring Surgeon : DR C OLIVIER
 Date of Consultation : 2025-05-21
 Date of surgery : 2025-05-28

Chronic Conditions

List of Chronic Conditions : HYPERTENSION
 DYSLIPIDAEMIA
 DEPRESSION
 ANXIETY

Medication in use : COZAAR 100MG /D
 SIMVASTATIN 40MG /D
 OMEZ 20MG /D
 BONIVA X1/PM
 ZYTOMIL10/D

Allergies : TRAMAL - causes Nausea

Clinical Examination:

Blood Pressure 1 : 100/40 mm Hg
 BMI :
 Height : 1.62 m
 Weight : 63 kg
 BMI : 24 Normal Weight

JACCOL : • Negative

Pulse : 76 BPM
 SpO2 : 93%
 CVS Examination: : Normal. All peripheral pulses palpable and equal bilaterally.
 Resp Examination: : Clear
 Abdominal Examination : Soft, non-tender
 Other Examination : FBC, UKE normal. Urine MCS clear. TFT's normal
 Chest X-Ray; : Clear with no infiltrates

Recommendation

ASA Classification : II
Recommendations before opp : Medically fit for surgery
Postoperative Monitoring : Highcare
Hours : 24
Specific instructions :

- Stop NSAID's
- Stop aspirin
- Stop supplements
- Stop Spices

Patient is extremely emotional - mostly due to pain and also due to financial strains. Temgesic added to the Stilpane. I've also referred her to the case manager to make arrangements for down payments on the additional costs involved pertaining to her procedure and hospital stay.

Thank you

Dr. H van Niekerk

Geskiedenis, Hoofklagte & vorige RX

Beste Dr. Olivier

Prof. le Roux het my na u toe verwys Ek het 'n afspraak by u vir Donderdag, 8 Mei om 11:15. Ek het April 2023 die eerste knieervanging gehad en Maart 2024 die revisieknieervanging deur Prof le Roux gedoen. Van toe af het ek die pyn op die kniekop (knieskyf patella) Elke tree wat ek gee het ek pyn en ek kan nie meer nie. Ek het aan die buitekant en bo die knie ook pyn. Ek epos die flikkergram (Eastrad Pretoria) Desember 2024 en die x-strale wat op 9 April 2025 in Port Elizabeth geneem is. Sal u asb. vir my help want dit is nou 14 maande na revisie knieervanging. As daar enige X-strale, scans MRI is wat u wil laat doen kan Suster Hanneke vir my die briefies epos. Dan kan ek dit Donderdag laat doen voor ek na u toe kom.

Baie dankie

Primère radiologie & interprétasie

Branch: PRETORIA EAST

Patient Name: MRS ALITA VISSER
Date of Birth: 19/11/1956
Main Member: MRS A VISSER
Referring Doctor: PROF T LE ROUX
Exam Date: 03/12/2024

Examination: Three-phase Bone Scan
Isotope: Tc99m MDP

ICD 10 Code: M25.56; M26.56
Dose: 25mCi

Dear Prof Le Roux

Thank you for the referral of Mrs Visser. Your support is highly appreciated.

Clinical History: The above-mentioned patient presented with persistent right knee pain. She had a right total knee replacement in April 2023 and revision was done in March 2024. She is known with osteoporosis.

Report:

→ There is mild increased blood pool activity in the right knee (distal femur and tibial plateau).

There is increased osteoblastic activity in:

1. Both hips, mild uptake in relation to the greater trochanters - bursitis
2. The right patella (mild) – inflammatory changes
3. The right proximal tibia/ tibial plateau. On the tomographic images there is also mild increased osteoblastic activity seen along the lateral aspect of the tibial stem.
4. Both ankles (mild) – early degenerative changes

Sacro-iliac osteoblastic activity is normal.

The rest of the study is within normal limits.

Conclusion:

The increased uptake noted in the tibial plateau/ lateral stem is likely still part of post-operative bone remodelling – increased uptake in knees can be seen up to 18 months after surgery.

There is no typical evidence of sepsis or loosening.

Regards

Dr Annatjie van Niekerk

revision (2024)

Comparison

30/10/2023

Findings

There is evidence of recent revision of a total right knee replacement with hardware in situ. In comparison to previous imaging , the femoral and tibial hardware components have been changed , with a ? Spacer

Satisfactory alignment of hardware with no radiological complications.

No lytic or sclerotic bony lesions. No periosteal reaction

Soft tissues are unremarkable

Thank you for this referral
